

LV/MV/HV Transformers

Key Features

We offer a range of multi-tapped transformer hire solutions, from 100kVA. Our fleet of transformers complements both our generator loadbank hire fleets. Transformer hire is also available separately. Our transformers for hire are available within ISO shipping containers (approved for lifting). For locations with more difficult access routes, the transformers are available trailer mounted. Below is a summary of our transformer fleet:

- 100kVA to 8000kVA capacities
- Various operating voltages
- MV/LV switchgear contained
- Step up/step down configurations
- ISO shipping style containers
- ONAN/ONAF types
- YYO/DYN11/YNyn0 vectors

Speak to our specialist applications team to discuss your transformer requirements. We are experienced in delivering a range of HV projects and work closely with our clients' senior authorised persons (SAP) to ensure smooth project delivery.
