Meeting noise restrictions at an on-site data centre

Compliance to noise restrictions proved a challenge when an on-site data centre in Birmingham required a temporary generator during major emergency repairs works to its own unit.

Due to the city-centre location, the site was particularly noise sensitive and the generator needed to comply with strict noise regulations.

A 150kVA SilentPlus HIMOINSA model in a silent canopy fitted the bill perfectly, due to its very low noise output of less than 65dBA at 7m.

LOCATION: BIRMINGHAM, UK. TYPE OF PROJECT: PRODUCT HIRE. SECTOR: DATA CENTRE
