

## Mitigating production risk for a leading dairy manufacturer

Arla Foods is the UK's largest farmer-owned dairy cooperative, comprised of 11,200 farmers across seven countries.

When the Leeds manufacturing plant experienced an incoming mains transformer failure, we received an emergency callout at 3am. We mobilised 2 x 1250kVA silent synchronised generators, 50m cable and an 18,000L fully bunded bulk fuel tank within the hour.

Our kit was selected to ensure the generators could run continuously until repairs had been made to prevent downtime and loss of production.

LOCATION: LEEDS, UK. TYPE OF PROJECT: PRODUCT HIRE. SECTOR: MANUFACTURING
