

Providing full-service power partnership to a food waste power producer

We provide a full-service power partnership to Northwick Power, who produce electricity via anaerobic digestion of food waste and solar.

We support Northwick Power on a turnkey basis, which ranges from providing 3,200kVA generator hire – comprised of 2 x 1600kVA generator units to support plant infrastructure – to supporting various other upgrade and planned maintenance projects for auxiliary power from 35 to 500kVA.

We also provide a 24/7 back-up service for any emergency requirements, working to agreed SLAs and ensuring their operation works as efficiently as possible.

LOCATION: GLOUCESTERSHIRE, UK. TYPE OF PROJECT: PRODUCT HIRE, SERVICE & MAINTENANCE, CONTINGENCY PLANNING.
SECTOR: UTILITIES, RENEWABLE ENERGY
