

Providing safe temporary power for a major recycling operator

A large Midlands recycling operator required a temporary power supply to power its new, heavy duty waste wood shredder while the site's mains electricity infrastructure was upgraded.

We supplied an 800kVA containerised mobile generator with fuel management and temporary cabling which included Powersafe powerlock connectors. The connectors were selected to guarantee safe working conditions and speed of connection – this was ideal for single and three phase applications.

LOCATION: COVENTRY, UK. TYPE OF PROJECT: PRODUCT HIRE. SECTOR: WASTE MANAGEMENT
