Rapid emergency support for a central London food manufacturer

When a central London food manufacturer experienced a power loss, we provided emergency support.

The customer experienced a power outage in the middle of the COVID-19 pandemic. We reacted to the call-out immediately and delivered a 500kVA generator and 3000L fuel tank to site within 4 hours of the initial call.

Our power generation equipment remained on site for 3 months, until the power had been upgraded and restored.

The General Manager said, "Thanks for providing us with the power generation equipment so promptly. It has certainly been a dramatic time for us, but Woodlands really helped by making the generator hire process so straightforward."
