INDUSTRIAL RANGE

HIMOINSA Company with quality certification ISO 9001

HIMOINSA gensets are compliant with EC mark which includes the following

- 2006/42/CE Machinery safety.
 2014/30/UE Electromagnetic compatibility.
 2014/30/UE electrical equipment designed for use within certain voltage limits
 2000/14/EC Sound Power level. Noise emissions outdoor equipment. (amended by
- 2005/88/EC)

 97/68/EC Emissions of gaseous and particulate pollutants. (amended by 2012/46/EU)

 EN 12100, EN 13857, EN 60204

Ambient conditions of reference according to ISO 8528-1:2018 normative: 1000 mbar, 25°C, 30% relative humidity.

Prime Power (PRP):
According to ISO 8528-1:2018, Prime power is the maximum power which a generating set is capable of delivering continuously whilst supplying a variable electrical load when operated for an unlimited number of hours per year under the agreed operating conditions with the maintenance intervals and procedures being carried out as prescribed by the manufacturer. The permissible average power output (Ppp) over 24 h of operation shall not exceed 70 % of the PRP.

Emergency Standby Power (ESP):
According to ISO 8528-1:2018, Emergency standby power is the maximum power available during a variable electrical power sequence, under the stated operating conditions, for which a generating set is capable of delivering in the event of a utility power outage or under test conditions for up to 200 h of operation per year with the maintenance intervals and procedures being carried out as prescribed by the manufacturers. The permissible average power output over 24 h of operation shall not exceed 70 % of the ESP

Continuous Power (COP): According to Standard ISO 8528-1:2018, this is the maximum power available for continuous loads for unlimited running hours a year between the maintenance times recommended by the manufacturer under the environmental conditions established by the same.

G2 class load acceptance in accordance with ISO 8528-5:2013

Industrial design under patent.

Engine Specifications | 1.500 r.p.m.

Rated Output (PRP)	kW	483
Rated Output (ESP)	kW	573
Manufacturer		PSI
Model		31.8L
Engine Type		4-stroke Otto Cycle
Injection Type		Carburization
Aspiration Type		Turbocharged and after-cooled
Number of cylinders and arrangement		12-V
Bore and Stroke	mm	150 x 150
Displacement	L	31,8
Cooling System		Liquid (water + 50% glycol)
Lube Oil Specifications		API CD/≥CF, SAE 15W40
Compression Ratio		10,5:1

Fuel Consumption ESP	Nm3/h	160,2
Fuel Consumption 100% PRP	Nm3/h	137,3
Fuel Consumption 75 % PRP	Nm3/h	107,2
Fuel Consumption 50 % PRP	Nm3/h	80,7
Fuel Consumption 25 % PRP	Nm3/h	49,4
Total oil capacity	L	112
Total coolant capacity	L	176,2
Heat dissipated by coolant	kW	477
Governor	Туре	Electrical
Air Filter	Туре	Dry

- Natural Gas engine
- 4-stroke cycle
- Water-cooled
- 24V electrical system
- Dry air filter
- Radiator with pusher fan
- HTW sender
- LOP sender

- Electronic governor
- Hot parts protection
- Moving parts protection

Generator Specifications | STAMFORD

Manufacturer		STAMFORD
Model		HCI544E
Poles	No.	4
Connection type (standard)		Star-series
Mounting type		S-0 18''
Insulation	Class	H class

Enclosure (according IEC-34-5)	IP23
Exciter system	Self-excited, brushless
Voltage regulator	A.V.R. (Electronic)
Bracket type	Single bearing
Coupling system	Flexible disc
Coating type	Standard (Vacuum impregnation)

- Self-excited and self-regulated
- 4 poles
- IP23 protection
- H class insulation

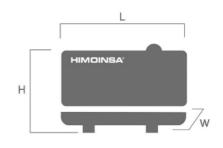

WEIGHT AND DIMENSIONS

		Standard Version
Length (L)	mm	5.960
Height (H)	mm	2.856
Width (W)	mm	2.622
Maximum shipping volume	m³	44,63
Weight with liquids in radiator and sump	Kg	9323
Autonomy	Hours	Ask

APPLICATION DATA

EXHAUST SYSTEM

Maximum exhaust temperature	°C	581
Exhaust Gas Flow	m³/min	90
Maximum allowed back pressure	kPa	10,2
Exhaust Flange Size (external diameter)	mm	200
Heat dissipated by exhaust pipe	kW	328

NECESSARY AMOUNT OF AIR

Intake air flow	m³/h	1680
Cooling Air Flow	m³/s	25,58
Alternator fan air flow	m³/s	1,035

STARTING SYSTEM

Starting power	kW	11,7
Starting power	CV	15,91
Auxiliary Voltage	Vdc	24

FUEL SYSTEM

Fuel Oil Specifications		Natural Gas
Lower heating value (LHV)	kWh/Nm3	9,853
Composition *		95% Methane
Fuel supply connection size	Inches	3
Fuel supply pressure	mbar	17 - 27

- · Steel chassis
- Anti-vibration shock absorbers
- External emergency stop switch
- Bodywork made from high quality steel plate
- High mechanical strength
- Low noise emissions level
- Soundproofing provided by high-density volcanic rock wool
- Epoxy polyester powder coating
- Full access for maintenance (water, oil and filters, no need to remove the canopy)
- Reinforced lifting hooks for crane hoisting

Soundproofed version

- Watertight chassis (acts as a double barrier against liquid retention)
- Chassis drain plug
- Steel residential silencer -35db(A) attenuation.
- Oil sump extraction kit
- IP Protection according to ISO 8528-13:2016

Gas ramp

- Manual shut-off valve
- Gas filter
- Double solenoid valve
- High pressure regulator
- Primary pressure regulator
- Low pressure switch
- High pressure switch
- Valve (tightness) testing system
- Inlet pressure manometer
- Outlet pressure manometer
- Special Start/Stop sequence

CONTROL **PANELS**

M5

Digital manual Auto-Start control panel and thermal magnetic protection (depending on current and voltage) and differential with CEM7.

Digital control unit CEM7

AS5

Automatic panel WITHOUT transfer switch and WITHOUT mains control with CEM7 unit. (*) AS5 as optional with CEA7 unit. Automatic panel without transfer switch and WITH mains control.

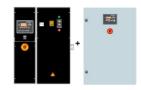

CC2

Himoinsa Switching cabinet WITH display.

Digital control unit CEC7

AS5 + CC2

Automatic panel WITH transfer switch and with mains control. The display will be on the genset and on the cabinet.

Digital control unit CEM7+CEC7

AC5

Automatic mains failure control panel. Wall-mounted cabinet WITH transfer switch and thermal magnetic protection (depending on current and voltage).

Digital control unit CEA7

- Electric control and power panel with measurements devices and control unit (according to necessity and configuration)
- 3-pole thermal magnetic circuit breaker
- Adjustable earth leakage protection (time & sensitivity) standard in M5 and AS5, with thermal magnetic protection
- Battery charger (standard on gensets with automatic control panels)
- Heating resistor (standard on sets with automatic control panels)
- Battery charger alternator with ground connection

Electrical system

- Starter battery/ies installed (cables and bracket included)
- Ground connection electrical installation with connection ready for ground spike (not supplied)
- · Battery Switch (Opcional).
